**Below is a brief description of the Lyxor Hedge Fund Strategy Indices:**

**Special Situations** is a strategy that encompasses a combination of investment processes targeting equities or bonds whose valuation is altered by a special situation such as spin-offs, industry consolidations, liquidations, reorganizations, share buybacks and other extraordinary corporate transactions that generate investment opportunities.

**Merger Arbitrage** is a strategy that primarily consists of investing in equities involved in merger/acquisition operations and aims to take advantage of the spread between the price bid for the takeover and the price observed in the market.

**Distressed Securities** is a strategy that consists of investing in (or selling short) securities of companies for which the price has been, or is expected to be, affected by a distressed situation (e.g., pre- or post- bankruptcy).

**Convertible Bonds and Volatility Arbitrage** are strategies that aim to take advantage of volatility arbitrage opportunities by investing in various financial instruments. Convertible Bonds funds primarily invest in convertible bonds and discretionarily hedge some of the underlying risk factors (interest rate risk, credit risk, market risk) in order to gain exposure to volatility and/or credit risk at a very attractive price.

**Fixed Income Arbitrage** is a strategy that aims to take advantage of pricing anomalies between fixed income securities, sectors, markets and yield curves.

**L/S Credit Arbitrage** strategy is a directional strategy that involves buying bonds and credit and fixed income derivative instruments that are expected to appreciate and selling the ones that are expected to depreciate.

**Global Macro** is a strategy that aims to take advantage of expected macroeconomic trends and may invest in all types of markets and instruments.

**CTAs Long Term** is a strategy that aims to capture price movements in fixed income, equity, currency and commodity markets with the use of systematic trading models.

**CTAs Short Term** is a strategy that aims to capture short term price movements in fixed income, equity, currency and commodity market with the use of systematic trading models.

**L/S Equity Variable Bias** is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate. The portfolio's net exposure to the market (possibly net long, net short or market neutral) will be actively managed depending on the manager's expectations.

**L/S Equity Long Bias** is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate, while structurally maintaining a net long exposure to the equity market.

**L/S Equity Short Bias** is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate while structurally maintaining a net short exposure to the equity market.

**L/S Equity Market Neutral** is a strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate while generally neutralizing broad equity market risks.

**L/S Equity Statistical Arbitrage** is a strategy that primarily consists of investing in some equities and selling short other equities. The security selection approach is typically based on quantitative analysis of either fundamentals, prices, or a combination of the two. This strategy typically seeks to offer limited exposure to equity market risks.

**Below is a brief description of the Lyxor Hedge Fund Thematic Indices:**

**Lyxor Top 10 Index** aims to measure the performance of the largest hedge funds within the Lyxor Platform by the size of the asset under management regardless of the Hedge Fund Strategy followed.

**Lyxor Credit Strategies Index** aims to measure the performance of hedge funds following any type of credit and fixed income related strategies : take advantage of pricing anomalies between fixed income securities, sector, market and yield curves, buying bonds or credit or fixed income derivative instruments that are expected to appreciate and selling the ones that are expected to depreciate.

Each index is reviewed and rebalanced on a monthly basis in line with investment guidelines and reflecting the evolution of assets under management and liquidity constraints. Owned by Société Générale Index, the indices are calculated and published on a daily basis by Standard and Poors on Bloomberg and Reuters.

A dedicated website [www.lyxorhedgeindices.com](http://www.lyxorhedgeindices.com) provides monthly factsheets, valuations, performance and methodology and performance analyse

#### **Societe Generale**

Societe Generale is one of the largest financial services groups in the euro-zone. The Group employs 157,000 people worldwide in three key businesses:

- Retail Banking, Specialised Financing & Insurance: Societe Generale serves 32 million individual customers worldwide.
- Private Banking, Global Investment Management & Services: Societe Generale is one of the largest banks in the euro-zone in terms of assets under custody (EUR 3,246 billion, March 2010) and under management (EUR 164 billion excluding Amundi, March 2010).
- Corporate & Investment Banking: Societe Generale tailors solutions for its clients across sectors by capitalising on its worldwide expertise in investment banking, global finance, and global markets.

Societe Generale is included in the socially-responsible investment indexes: FTSE4Good and ASPI. In 2010, the title of SAM Sector Mover was awarded to Societe Generale.

[www.societegenerale.com](http://www.societegenerale.com)

Société Générale **Index** (SGI) is a leading index provider part of the Société Générale group. SGI is closely linked to the Global Equities and Derivatives Solutions division, which has been recognised as a global leader in equity derivatives for many years.

The SGI offer is organised around two main ranges of indices, each addressing a specific need either in terms of portfolio diversification or alpha generation. Furthermore, SGI indices can ultimately be combined in more sophisticated core-satellite strategies to extract the added value of both spheres.

- $\alpha$ -research indices seek to deliver an excess return over traditional indices by reflecting the evolution of strategies based on systematic or discretionary investment processes.
- $\beta$ -research indices aim to provide an exposure to new investment themes, alternative markets and asset classes

#### **Lyxor Asset Management** - [www.lyxor.com](http://www.lyxor.com)

Created in 1998, Lyxor Asset Management currently manages EUR 88.60 billion\*. A wholly-owned subsidiary of Société Générale Group, belonging to the Corporate and Investment Banking arm of the group, the asset management company specializes in three businesses:
