

Publication according Directive 2014/65/EU in financial instruments (MiFID II) Article 27(10)(b)

RTS 28 information on the top five execution venues and on the quality of execution for all executed client orders for class of financial instruments:

Annex I: Classes of financial instruments

- (A) **Equities – Shares & depositary receipts**
  - (i) Tick size liquidity bands 5 and 6 (from 2000 trades per day)
  - (ii) **Tick size liquidity bands 3 and 4 (from 80 to 1999 trades per day)**
  - (iii) **Tick size liquidity band 1 and 2 (from 0 to 79 trades per day)**
- (B) **Debt instruments**
  - (i) **Bonds**
  - (ii) Money markets instruments
- (C) Interest rates derivatives
  - (i) Futures and options admitted to trading on a trading venue
  - (ii) Swaps, forwards, and other interest rates derivatives
- (D) **Credit derivatives**
  - (i) Futures and options admitted to trading on a trading venue
  - (ii) **Other credit derivatives**
- (E) **Currency derivatives**
  - (i) Futures and options admitted to trading on a trading venue
  - (ii) **Swaps, forwards, and other currency derivatives**
- (F) Structured finance instruments
- (G) **Equity derivatives**
  - (i) **Options and futures admitted to trading on a trading venue**
  - (ii) **Swaps and other equity derivatives**
- (H) Securitized derivatives
  - (i) Warrants and certificate derivatives
  - (ii) Other securitized derivatives
- (I) Commodities derivatives and emission allowances derivatives
  - (i) Options and futures admitted to trading on a trading venue
  - (ii) Other commodities derivatives and emission allowances derivatives
- (J) Contracts for difference
- (K) **Exchange traded products (exchange traded funds, exchange traded notes and exchange traded commodities)**
- (L) Emission allowances
- (M) Other instruments

## Qualitative Best Execution

April 2021 for the year 2020  
 Qualitative Best Execution Measures

### Equities and Equity-like Instruments

Equity transactions are placed by Lyxor Deutschland with brokers who have access to the relevant exchanges and venues for execution, and have the expertise and the required understanding of Lyxor's trading objectives. Equity transactions are either placed with a sales trader or through electronic channels provided by the intermediary, such as through direct market access, algorithms and direct capital access.

Unless stated otherwise, across all equity products, including equity-like instruments, such as exchange traded funds (ETFs), the ranking of the execution factors is typically as follows:

- Investment objective of the underlying strategy
- Price
- Likelihood of full execution
- Speed

The remaining Execution Factors – cost (including implicit cost such as impact on the market), order size, current liquidity conditions and any other consideration relevant to the efficient execution of a Client order – are generally given equal ranking unless the investment strategy requires a different weighting.

In instances where orders exceed the volumes typically available on regulated markets, large orders (or "block trades") may be traded in over-the-counter markets, through private bilateral negotiation.

Orders sent by portfolio managers in a defined order window may be aggregated and communicated to the executing broker counterparty as a single order in accordance with formalized internal aggregation and allocation procedures, designed to ensure that all portfolios be treated fairly and equitably over time.

### Fixed Income

For liquid bonds, electronic (MTF) platforms such as Bloomberg, MarketAxess or TradeWeb are generally available and provide the opportunity for simultaneous, competitive bid /offer quotes as well as request for quote (RFQ) type price discovery. Such platforms typically are the preferred venues on which to effectively execute certain types of fixed income transactions.

In general, they help to perform the price discovery function and seek best price by initiating competition among multiple independent third parties.

However, such platforms are not necessarily appropriate for transactions above a certain size or in less liquid instruments because the leakage of trade interests to the market can adversely affect the relevant pricing and inadvertently compromise the ability to obtain the best result available for the transaction.

Unless stated otherwise, across all fixed income trades the ranking of the execution factors is typically as follows:

- Investment objective of the portfolio's strategy
- Price
- Likelihood of full execution
- Settlement considerations
- Speed

For transactions which are not executed using an order book or RFQ based trading venue, Lyxor will use reasonably available and relevant sources of price discovery, including, but not limited to, market transaction prices on historical or comparable financial instruments; quotes for, or yields on, historical or a comparable financial instrument; price runs and dealer quotes. Quotes generally should be obtained from more than one counterparty as part of the price discovery process; however that is not always possible nor necessarily helpful in the process. Alternatively, there may be only one potential counterparty and therefore, obtaining multiple quotes is not possible.

Lyxor will consider on a trade by trade basis whether obtaining multiple quotes can be or should be attempted based on the security type, liquidity, size of the transaction and prevailing market conditions. For those less liquid or larger in size transactions the trading desk will use broker contacts as well as electronic platforms to search for natural, matching liquidity or alternatively ask for capital commitment.

### Exchange-traded Derivatives (ETDs)

ETDs are traded similarly to equities; orders are placed in the exchange order book either directly by using a counterparty's electronic channel or by sending the orders to the counterparty who then places the order in the order book.

Depending on the size, complexity, liquidity and prevailing market conditions it will be considered on a trade by trade basis whether obtaining multiple quotes can be or should be attempted through broker contacts as well as electronic tools such as RFQ platforms to search for matching liquidity.

Unless stated otherwise, across all fixed income trades the ranking of the execution factors is typically as follows:

- Investment objective of the portfolio's strategy
- Price
- Likelihood of full execution
- Speed

The remaining Execution Factors – cost (including implicit cost such as impact on the market), order size, current liquidity conditions and any other consideration relevant to the efficient execution of a Client order – are generally given equal ranking unless the investment strategy requires a different weighting.

### Over-the-Counter (OTC) Derivatives, excluding FX

All OTC derivatives must be traded under industry legal documentation. This means the choice of counterparty for trading certain instruments such as interest rate swaps, credit default swaps, swaptions, inflation swaps, asset swaps, currency options and other more bespoke instruments can be limited to those banks where the required documentation is in place.

Similar to fixed income trading electronic (MTF) platforms are generally available for several derivatives instruments, providing the opportunity for simultaneous, competitive bid /offer quotes as well as request for quotes (RFQ) type price discovery.

For instruments where those platforms are not liquid enough or the trade specifics require a different approach the trading desk will follow a similar path as described for illiquid fixed income instruments, using a sufficient number of quotes to achieve price discovery without risking information leakage to the market which could adversely impact pricing.

### Foreign Exchange (FX)

Foreign Exchange transactions can be conducted through the appointed custodian bank or third party brokers. All OTC FX derivatives must be traded under industry legal documentation with the required collateral agreements in place. Where possible a settlement using CLS is put in place.

The nature of the trade and its underlying investment strategy are significant factors in the choice of the appropriate execution strategy.

FX Execution will typically and preferably take place via electronic multibank platforms or ECN liquidity, using streaming quotes. Transactions are passed to those platforms through electronic channels where possible. Depending on the size, complexity, liquidity and prevailing market conditions Lyxor will consider on a trade by trade basis obtaining multiple quotes via electronic price streaming platforms or manually priced RFQs.

For less liquid or larger in size transactions the trading desk will use broker contacts as well as electronic tools such as RFQ platforms to search for matching liquidity or alternatively ask for capital commitment.

Unless stated otherwise, across all fixed income trades the ranking of the execution factors is typically as follows:

- Investment objective of the portfolio's strategy
- Price
- Likelihood of full execution
- Speed
- Settlement considerations

The remaining Execution Factors – cost (including implicit cost such as impact on the market), order size, current liquidity conditions and any other consideration relevant to the efficient execution of a Client order – are generally given equal ranking unless the investment strategy requires a different weighting.

### Ex-post review of the execution factors

Lyxor Best Execution Framework applies: an ex-post review of the execution factors and their relative importance will be conducted in the context of the semi-annual best execution committee and deemed relevant.

**Other important information**

a) a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;

Lyxor may have close links or common ownerships with respect to any execution venues used to execute orders, but there is no specific arrangements with any of these execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received, furthermore Lyxor has implemented appropriate measures to mitigate any risks of interests conflicts. In the event that the execution venue is a listed company, Lyxor may purchase from time to time shares in such company for the portfolios it manages in line with the portfolios' strategy and investment guidelines, again there, Lyxor has implemented appropriate measures to mitigate any related risks of conflicts.

b) a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;

Lyxor did not enter into any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received.

c) an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;

N/A

d) an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;

N/A

e) an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

N/A

f) an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Delegated Regulation (EU) 2017/575;

N/A

g) where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

N/A
